

# Chentian Jiang

chentian.jiang@duke.edu  
(732)500-8731  
Durham, NC

## Education

**Duke University** (2015-2019)  
B.S. in Computer Science  
Minor in Neuroscience  
GPA: 3.64/4.00

### Coursework:

- Data Structures and Algorithms
- Computer Architecture
- Discrete Math for Computer Science
- Introduction to Artificial Intelligence
- Design/Analysis of Algorithms

## Experience

### Telenor - Research Intern

June - July 2017 | Trondheim, Norway

- Improved the performance of a deep learning model that predicts customer responses from a noisy and unbalanced dataset
- Experimented with different deep learning model architectures from research papers using Tensorflow and Keras
- Delivered a formal presentation of results to senior researchers

### Pauca Startup at Duke - Software Engineer

January - May 2017 | Durham, NC

- Developed several front-end components in Swift for a group-based social media app
- Communicated with the lead developer and product designer to implement/improve features based on feedback

## Skills

### Knowledgeable

- Python
- Java
- HTML, CSS (Sass)

### Comfortable

- Javascript
- Swift
- Git

## Projects

### Anomaly Detection for Bow Tie Drawings

A web app with a drawing canvas that recognizes whether the user's drawing is a typical bow tie drawing or an anomalous one. The model is an autoencoder built with Tensorflow and trained on Google's Quick, Draw! dataset. The server-side uses Flask and the client-side is implemented in HTML, CSS and JS.

### Recommender System for GitHub Repositories

A collaborative filtering algorithm implemented in Python (NumPy) that recommends GitHub repositories based on a user's starred repositories. The dataset was created with the Requests library (Python) and GitHub's API.
